

Pensel GB-120

20021217

1. Chemical description

Pensel GB-120 is a pentaerythritol ester of highly stabilized Rosin resin.

2. Main application

Tackifier resins for various kinds of adhesives and sealants etc.

Pressure sensitive adhesives (Tape, Label)

Hot melt adhesives

3. Specifications

Appearance: Yellow flake

Color(Gardner): 7Max

Acid value(mgKOH/g): 10-20

Softening point(, R&B): 116-126

4. Characteristics

Besides good compatibility and tackifier properties, it has superior adhesion properties, especially at high temperature.

5. Packing

25 kgs (=55 pounds) net in paper bag
