PU-75, Urethane resin for food packaging inks

1997-05-15

Arakawa Chemical Industries, Ltd. has developed various Urethane resins as a binder for food packaging inks for Polyolefin films.

Our PU-75 was specially designed for the additive to Nitrocellulose type flexographic ink to give better adhesion to Polyolefin films.

Specifications

	<u>Solid (%)</u>	<u>Viscosity (cps, 25)</u>	<u>Color (Gardner)</u>	<u>Solvent</u>
PU-75	73 ~ 77	2,000 ~ 4,000	2 max.	Ethylacetate/IPA
